

FLEXSEAL® EDGE®

BENEFITS

No Radial Buckling!

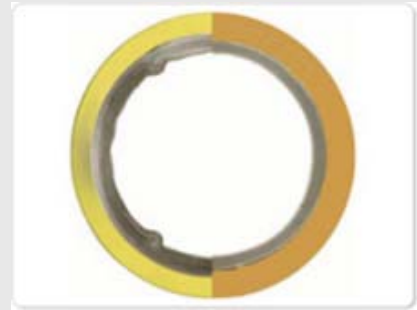

- › STABL-LOCK™ inner wrap construction prevents sealing element from flowing into and contaminating process stream
- › Made with the CONTROLLED DENSITY® process which ensures that the optimum filler density is constant across the windings for consistent compression and superior sealability

Tightest Seal

- › Retaining groove grips windings firmly, maintaining symmetrical cross-section for most effective seal
- › Modified guide ring ensure contact with all raised face surfaces

Multiple Applications

- › Dual flange (DF) design accommodates both 150 and 300# flanges- reducing inventory costs
- › Select from a wide variety of metallic and filler materials with a full range of temperature capabilities
